

August 16, 2018

Martin's Safety Training, a division of 2511214 Ontario Ltd, has been providing safety training preparing our workers for a busy production season.

The staff and trainers have proven to be very flexible while delivering information in a relaxed and enjoyable way. They are very efficient in working with people from all types of backgrounds and operating skills. The trainers are determined to help people relax and encourage the confidence to operate during the practical testing, while maintaining a solid base in legislation.

The office staff at Martin's Safety Training are very accommodating with scheduling, to meet our needs, and providing accurate documentation for each trained worker.

Based on the positive feedback from trainees and my own experience, I endorse Martin's Safety Training to meet the training needs of small and large organization.
